NIDO PRO

NIDO PRO is an Italian manufacturer of smart fertigation controllers for greenhouse automation. The product range includes NIDO ONE V2 (from EUR 1,490) for small-to-medium greenhouses up to 3,000L, and NIDO Industrial for professional operations up to 100,000L. Both automate pH and EC dosing, climate control, and irrigation with real-time app monitoring. Over 4,000 greenhouses worldwide use NIDO systems.

NIDO INDUSTRIAL**NIDO ONE V2**

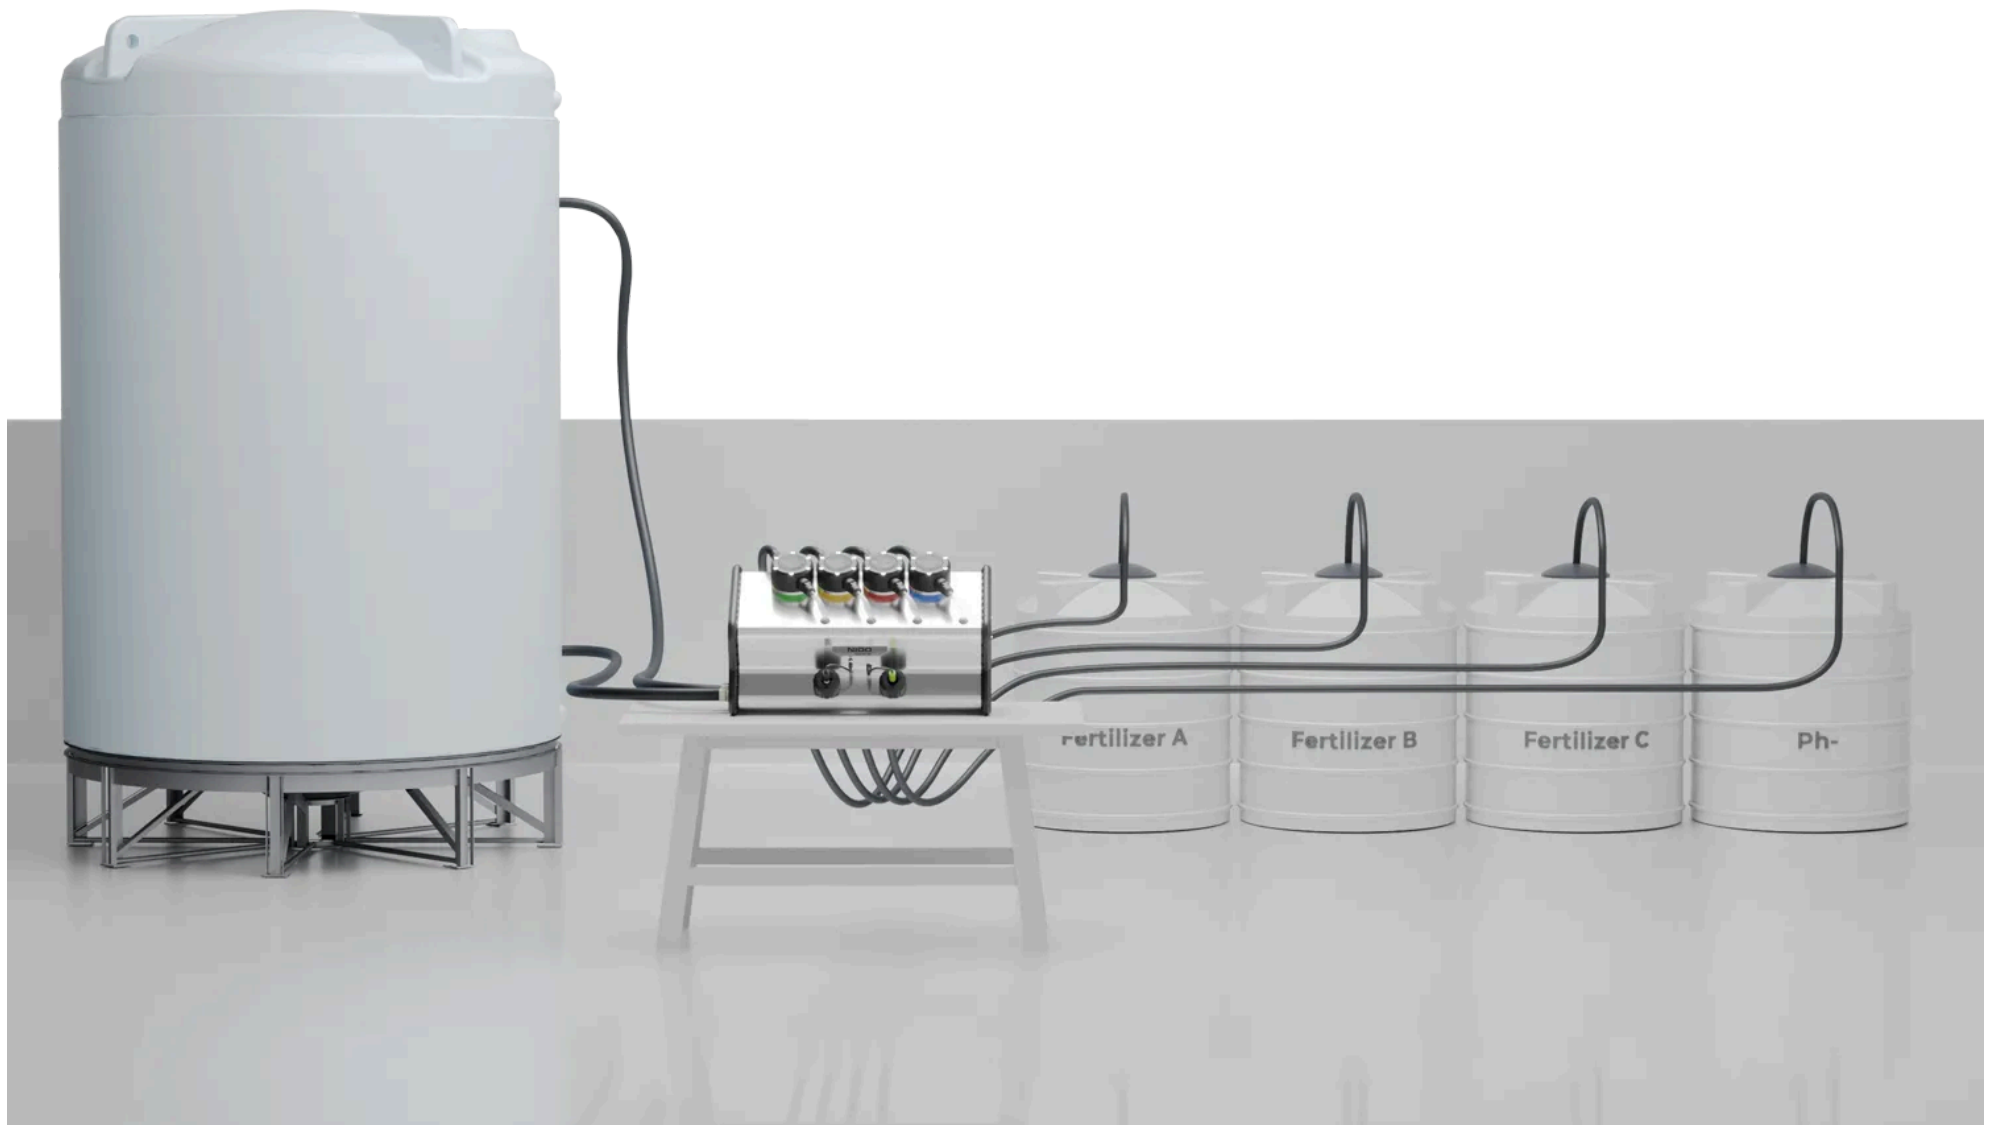

Industrial power, in a compact unit.

Designed for professional greenhouses and tanks **from 1,000 to 100,000 liters**, **NIDO INDUSTRIAL** brings big-system logic into an ultra-compact unit. It measures pH, EC, and temperature, adjusts directly in the tank, and keeps your nutrient solution consistently stable.

- ✓ Mixing tank with precise dosing and consistent parameters
- ✓ Quick installation, no complex control panels required

Compact and complete.

An advanced solution to feed your plants simply and effectively.

- ✓ Automatic pH and EC control
- ✓ Climate automation (temperature and humidity)
- ✓ Remote management via mobile app

Turning data into decisions.

With NIDO App, you monitor in real time. With NIDO Lab, you analyze, compare, and turn operations into strategy.

NIDO APP

NIDO LAB

Where NIDO delivers results.

One logic, at every scale.

From lab test benches to multi-span greenhouses, NIDO keeps pH and EC stable, doses precisely via mixing tank, and coordinates climate and devices via App & Lab. Fewer manual corrections, more operational continuity.

Hydroponics (NFT, DWC, substrates)

Stability that drives growth.

Continuous control of pH, EC, and solution temperature, in-tank dosing and repeatable recipes. Less fluctuation, more uniformity between rows.

Aeroponics

Precision where every droplet counts.

Stable parameters for exposed roots, fast corrections, and logged data to prevent stress or pH/EC drift.

Drip irrigation (soil & soilless)

Turn your reservoir into a fertigation system.

From tank to dripper: balanced nutrient solution, less waste, and consistent delivery season after season.

Vertical farming & indoor

Connected automation, 24/7.

Crop-specific recipes, climate and device control (via NIDO Plug), unlimited history to optimize cycle and quality.

Research, variety testing, education

Reliable data, repeatable trials.

Excel export, API access (NIDO Lab), period comparisons — every decision documented and traceable.

Professional greenhouses & nurseries

Scale without changing your logic.

From pilot setups to 1,000–100,000 L (with NIDO INDUSTRIAL): same platform, same simple management.
